

FIELDAGENT™ MOBILE

FieldAgent™ Mobile removes the guesswork from drone navigation while offering endless flight options and in-crop health map views. And, you can fly for free.

FieldAgent Mobile allows you to autonomously fly unlimited acres using a DJI Phantom series, Inspire series, or Mavic drone. Simply set the field boundaries, identify the flight parameters - now with as much overlap and sidelap as you want - and the drone will take off, fly the predetermined route, and automatically return to you upon completion. If a battery runs low, the drone returns for a battery swap, then picks up right where it left off - ensuring seamless data capture.

With FieldAgent Mobile, you can view crop health maps in-app - putting critical data in the palm of your hand.

You do not need a subscription to fly, simply sign-up in the app store and start flying!

FieldAgent Mobile showing flight planning options

FIELDAGENT™ MOBILE

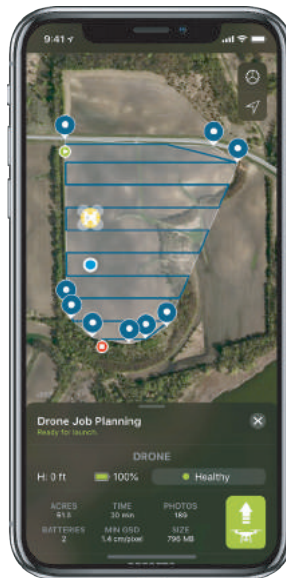

FEATURES & BENEFITS

- No limitations on acreage, overlap or sidelap, giving you limitless crop health data capture options
- Interactive, live flight planning giving visibility to exactly where your drone will fly, estimating battery count, time, and acreage
- View crop health maps in-app, no need to log onto a computer to retrieve crop health maps. All data is accessible in the app
- Compatible with DJI Phantom, Inspire, and Mavic series of drones, autonomously fly entire fields using a single app
- Fly for free! Anyone can sign up within the app and begin flying today!
- Seamlessly integrates with FieldAgent Web and Desktop

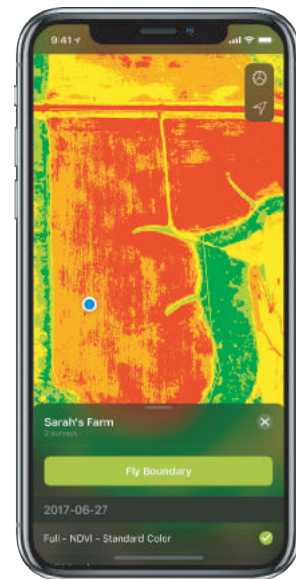

EFFORTLESS NAVIGATION

Step 1: Highlight Flight Area & Set Flight Specifications

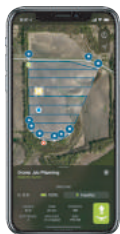

Step 2: Fly!

Step 3: Review Crop Health Maps Anytime, Anywhere

THE ONLY COMPLETE PRECISION AG DATA COLLECTION SOLUTION

Sentera's complete solutions enable you to collect and make use of highly precise on-field data in real time. Easily compare, share, and analyze your NDVI and NDRE plant health data in no time. Creating actionable data has never been easier.
